

Product Creation and Configuration on BGP Connect

INDSYS®

Step 1: Product Management

Login in respective retailer's sub domain → navigate to 'Product Management menu

Step 2: Product Creation:

The Product List view will be displayed → Click on the + icon to create new product and fill in the following fields and click on Save button

- **Retailer:** Select the Retailer from the drop-down menu in this field
- **Retailer Product Type:** Select the Retailer product type from the drop-down list in this field
- **Britannia Product Type:** This field will be auto selected based on the Retailer's Product type
- **Brand:** Select the Brand from the drop-down list in this field
- **Sub- Brand:** Select the Sun-Brand from the drop-down list in this field
- **Product Type:** Select Product Type from the drop-down list
 - **Catalog:** Use this option for static products
 - **Purchase Order:** Use this option for Dynamic / variable data products
 - **Both:** use this by default
- **Product Reference / CPC:** Enter the Original Product code in this field
- **Product Description:** Enter the product description in this field
- **Britannia Code:** Enter the internal reference code of respective product in this field
- **Reprintable:** Enable this checkbox if the artwork is to be made reprintable
- **Product Image:** Upload the image of the respective artwork in this field
- **Internal Notes:** Enter Internal notes in this field if required
- **Active:** Enable this checkbox to keep the product active

Step 3: Associating Variable Data fields:

Once the product Details are added and saved → navigate to 'variable Data fields' tab → Associate required VDF's by selecting the checkbox before VDF Code.

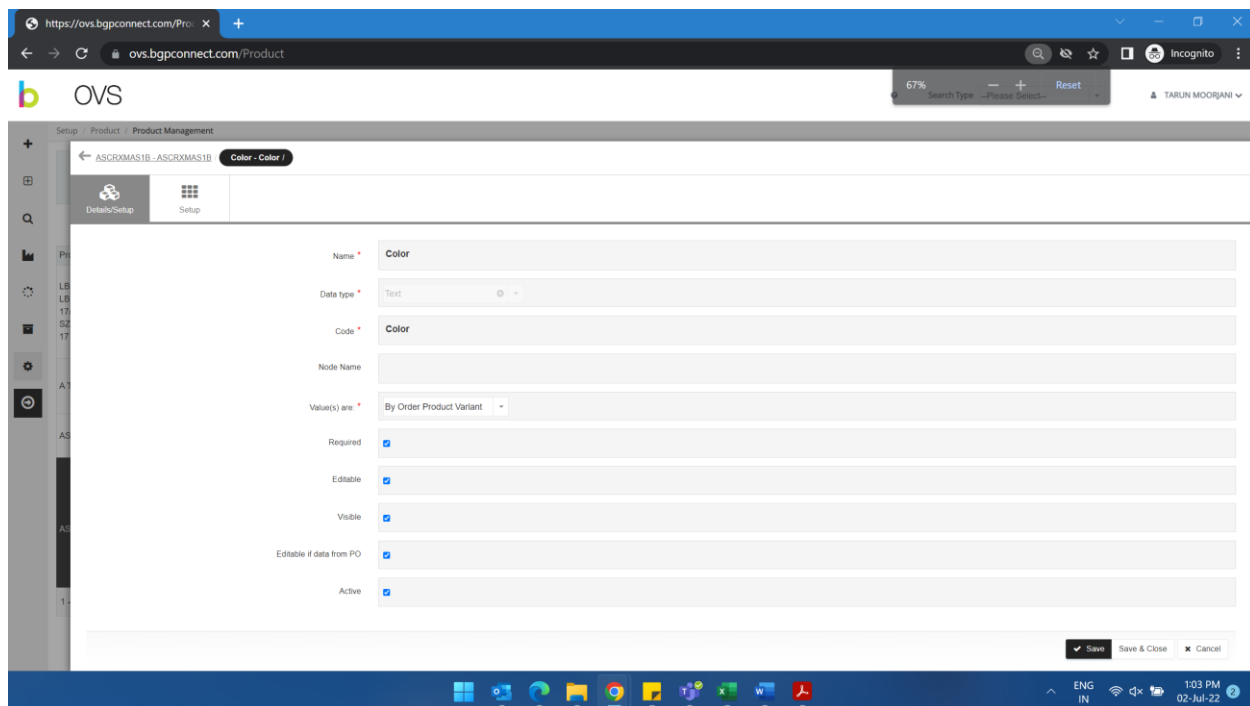

| Associated | Code | Name | Type | Value(s) are: | Active |
|-------------------------------------|-------------------|-------------------|--------------------|--------------------------|-------------------------------------|
| <input checked="" type="checkbox"/> | Color | Color | Text | By Order Product Variant | <input checked="" type="checkbox"/> |
| <input checked="" type="checkbox"/> | Country | Country | Custom Lookup List | By Order Product Variant | <input checked="" type="checkbox"/> |
| <input type="checkbox"/> | 100% Cotton Logo | 100% Cotton Logo | Yes/No | | <input checked="" type="checkbox"/> |
| <input type="checkbox"/> | BCI | BCI Logo | Yes/No | | <input checked="" type="checkbox"/> |
| <input type="checkbox"/> | Commercial Ref | Commercial Ref | Text | | <input checked="" type="checkbox"/> |
| <input type="checkbox"/> | Country of Origin | Country of Origin | Custom Lookup List | | <input checked="" type="checkbox"/> |

Step 3.1: Configuring Product / Variant level:

Once the required VDF's are associated with respective product → Double click on the respective VDF: its configuration page will be displayed → in the field “Value(s) are” choose from either following options and click on save

- **By Order Product:** use this option to map to product level in order screen
- **By Order Product variant:** Use this option to map it at line item / variant level.

Repeat this for all the associated VDF's.

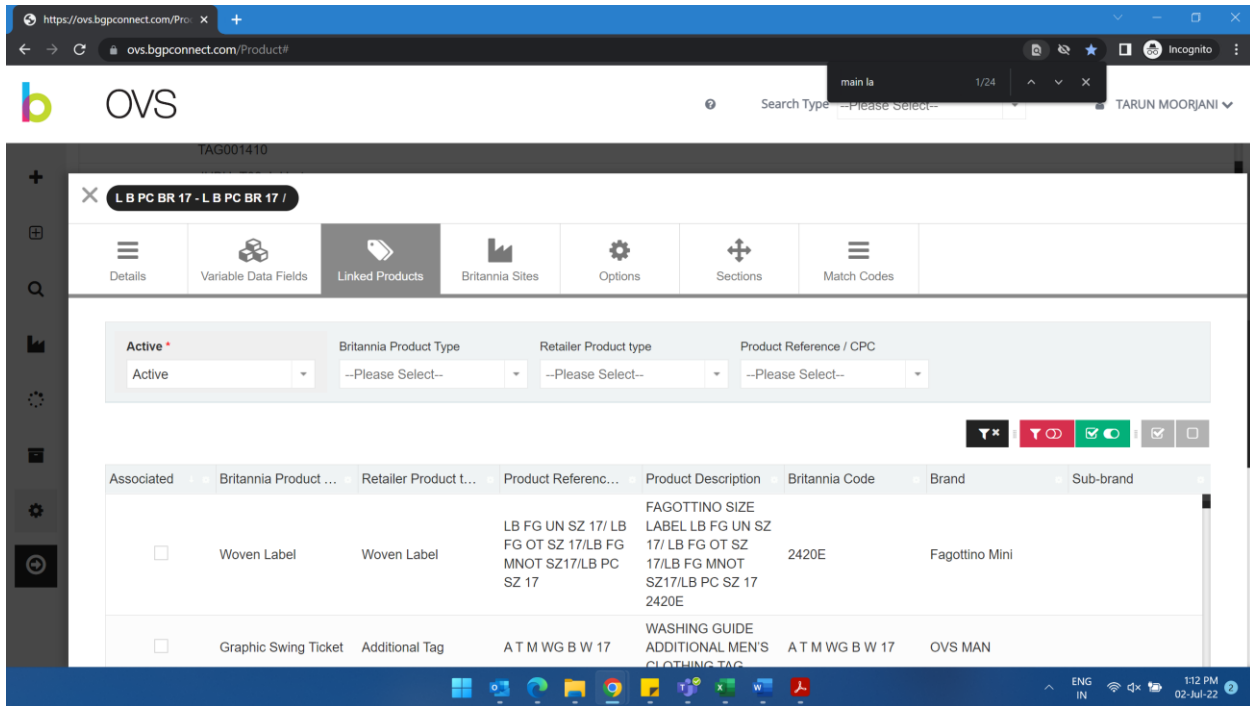

The screenshot displays the OVS Product Management web application. The browser address bar shows the URL <https://ovs.bgpconnect.com/Product>. The application header includes the OVS logo and a search bar. The main content area is titled 'Product Management' and shows a configuration page for a product variant named 'Color'. The configuration fields include:

- Name: Color
- Date type: Text
- Code: Color
- Node Name: (empty)
- Value(s) are: By Order Product Variant (selected)
- Required: ☒
- Editable: ☒
- Visible: ☒
- Editable if data from PO: ☒
- Active: ☒

At the bottom right of the configuration area, there are buttons for 'Save', 'Save & Close', and 'Cancel'. The Windows taskbar at the bottom shows the system clock as 1:03 PM on 02-Jul-22.

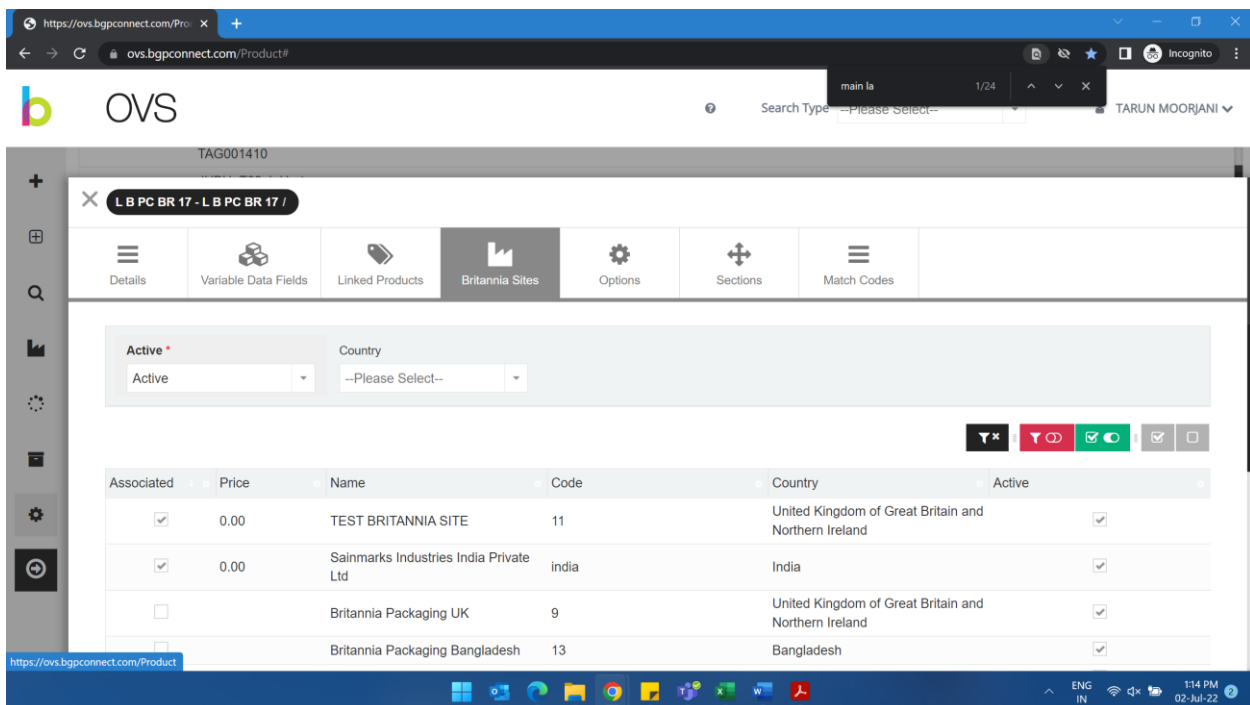

Step 4: Linked products:

Once VDF's are configured to requirement → navigate to “linked Products” tab against respective product → In case of kit or coupled products (Main and size label) this functionality helps us link 2 products: Search for the respective product to link and associate it by clicking the checkbox near the resultant searched product.

Step 5: Associating Britannia Site:

Once linked products are associated → Navigate to 'Britannia sites' tab against the same product → Associate respective production Britannia sites to respective product by enabling the checkbox next to the site

Step 6: Options:

Once Britannia sites are configured as required → navigate to Options tab and enter the values as required for the fields: Minimum quantity, Multiple, Uplift and Uplift overridable at order if need be or leave it to the default setting

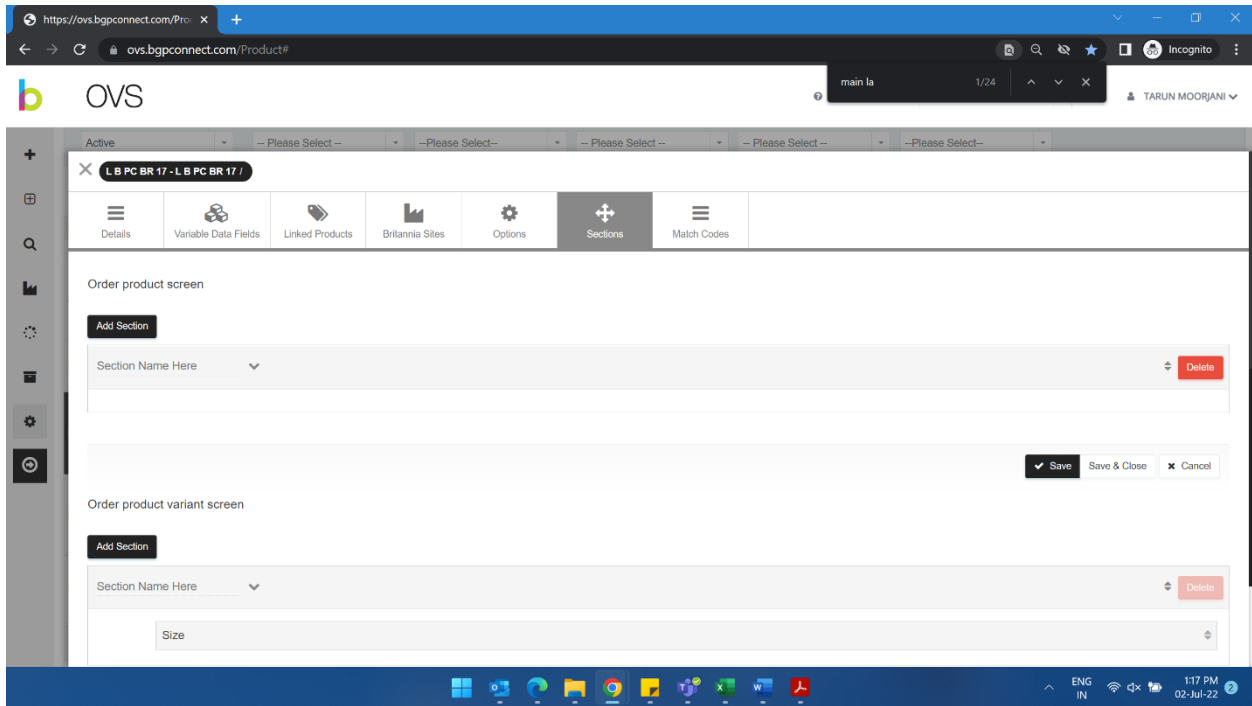

The screenshot shows a web browser window with the URL <https://ovs.bgpconnect.com/Product#>. The page displays the 'Options' tab for a product identified as 'L B PC BR 17 - L B PC BR 17'. The 'Product option' section contains the following fields:

- Minimum quantity ***: A text input field containing the value '1'.
- Multiple ***: A numeric input field with a spinner, containing the value '1'.
- Uplift**: A dropdown menu currently set to 'None'.
- Uplift overridable at order**: A checkbox that is currently unchecked.

At the bottom right of the form, there are three buttons: 'Save', 'Save & Close', and 'Cancel'. The browser's taskbar at the bottom shows the system time as 1:14 PM on 02-Jul-22.

Step 7: Sections

Once Options are configured → navigate to 'Sections' tab where the fields can be rearranged by selecting respective fields and drag and drop in required sequence.

Step 8: Match Codes:

Match codes are provided alias or alternative name which is used by the order importer

Navigate to 'match codes' tab against the respective product → click on + icon to add a match code for respective product and click on save button.
